

DEHUMIDIFIER

Healthy Home

Greenlite's ENERGY STAR dehumidifier effectively removes moisture to protect walls, curtains, furniture and appliances from mold and mildew. An ideal addition for medium to large rooms such as basements, crawl spaces, dens, bedrooms and bathrooms, this dehumidifier provides powerful moisture removal with minimal energy consumption.

Greenlite's ENERGY STAR dehumidifier has a unique lift-and-twist design that offers unparalleled flexibility. When operating in expanded form, it has up to 3 times more water tank capacity than traditional dehumidifiers and can run much longer without the hassle of emptying the bucket. In nested form, the unit is half the size allowing for compact storage. The innovative design offers you the flexibility to detach it from the bucket and place it over a drain or sink.

DEHUMIDIFIER

Wifi Dehumidifier – Control your energy star dehumidifier with a Smartphone or Voice Control Assistant (works with Alexa). Download the Cube Air App to control all functions in real-time from anywhere. Get notified when it's time to empty the bucket.
