

Ideal Applications

ANTIBACTERIAL LED A-Type

These disinfecting antibacterial light bulbs are the perfect choice for beautiful energy-efficient lights that help fight germs and odors with continued purification when on. When the LED bulb is switched on, the coating is activated. The natural circulation of the air brings germs, odors, and any other organic compounds into contact with the coating which then helps neutralize the substances on its surface. These bulbs are completely safe to use around humans, animals, and plants.
