

The MPW-V passive infrared (PIR) occupancy sensors turn lighting on and off based on occupancy and ambient light levels. The light level feature keeps lights from turning on if the ambient light level is sufficient. The sensors can be configured to turn lighting on, and hold it on as long as PIR technology detects occupancy. After no movement is detected for the selected time delay, the lights switch off.

Features

- Passive Infrared Technology (PIR).
- PIR Wall Mount Occupancy Sensor, Line Voltage, Light Level Sensor
- 150° field of view,
- Coverage: 1000sq.ft
- Simple, fast installation

- Energy efficient, super bright LED
- Adjustable time delay.
- Multi-level 150° Fresnel lens for superior occupancy detection
- Color: White
- 2-Year warranty
