

WATER CONSERVATION Flow Rate Bag

Conserve water and save money

Measure your water usage

Greenlite's flow rate bag allows you to check your showerheads and aerators and measure how much water you are using. To use simply place the bag under the showerhead or aerators and turn on the water for 5 seconds. The lines on the bag act as a gallons per minute calculator.

WATER CONSERVATION

Flow Rate Bag

This flow rate bag determines how much water you could be saving by switching to low flow showerheads and aerators. Knowing how much water you are using is the first step in water conservation.

Specifications:

- Measures flow rate in gallons per minute (GPM) and liters per minute (LPM).
- Estimates water use from 0.5 gpm to 5 gpm and liter equivalents
- Markers at 0.5 gpm, 1 gpm, 1.2 gpm 1.5 gpm, 1.75 gpm 2 gpm, 2.2 gpm, 3 gpm, 4 gpm, and 5 gpm (with metric equivalents)
- Size: 16 × 7 × .01 in
- Weight: 0.01 lbs
- Case Qty: 1,000

Features:

- Sturdy plastic bag for showerheads and aerators
- Easy to use
- Instructions printed on bag
- Reusable
