

WATER CONSERVATION

Low Flow Hand Held Showerhead Kit

Conserve Water and Save Money

High-efficiency showerhead kit use on average less than half the water of a standard showerhead while maintaining a powerful flow. This saves both water and the energy used to heat water.

Low-Flow High-Efficiency Showerheads help you save water and reduce your electricity bill without compromising the water pressure you are used to! Designed to give you three great shower settings: enjoy gentle rain, massage, and combination.
