

WATER CONSERVATION Hot Water Gauge Card

Conserve water and save money

Prevent Scalding

A hot water gauge determines when your water is too hot. It helps prevent scalding from hot water from water sources such as baths and showers. No batteries required - simply dip the card into a cup of water you are testing!

WATER CONSERVATION

Hot Water Gauge Card

In most homes, if the temperature is 120 degrees Fahrenheit or more then the hot water is turned up too high. This Hot Water Gauge Card shows the hot water temperature to see whether or not the proper settings are in place.

- No batteries or power required
- Helps prevent scalding from hot water
- Helps you adjust your hot water heater and save on energy
- Easy to use thermo strip to detect temperature

Size: 3 3/8" W x 2 1/2" H x 5/8" D.
